Educational Process: International Journal (EDUPIJ) is an Open Access journal that publishes peer-reviewed, high-quality articles from a wide range of theoretical and methodological perspectives spanning the full spectrum of education field. The journal welcomes submissions from across the world with a particular focus on originality and significance to international audience regardless of reporting research carried out in just one location or cultural setting or in broader contexts. Research published in the journal engages with the changing complexities and realities of educational context with a focus on all levels of formal education from early childhood through high school and higher education.

EDUPIJ uses the double-blind system for peer-reviews; reviewers do not know the identity of the author(s), nor do author(s) know the identity of the reviewers. Articles are reviewed by three expert peers; two external reviewers and one editor from the journal.

Publication in EDUPIJ is conditional on submitted articles not having been previously published or currently submitted elsewhere for review towards publication. Contributions submitted to EDUPIJ for publication must be the author(s) original work. Papers sent to the journal are subject to rigorous editorial check prior to peer-review process. The submissions which cannot verify content originality are desk-rejected. The journal asks for similarity check reports obtained from iThenticate or from other reputable similarity checking tools.

Disclaimer/Publisher's Note: The opinions, statements, and data presented in all publications are solely those of the individual author(s) and contributors and do not reflect the views of Universitepark, EDUPIJ, and/or the editor(s).
